The Vagina Monologues, written by playwright and activist Eve Ensler, is an award-winning play based on over 200 interviews Ensler conducted with women about their experiences and memories with their sexuality. Each monologue deals with an aspect of the female experience, touching on matters such as sex, love, rape, menstruation, female genital mutilation, masturbation, birth, orgasm, sexual orientation, and social stigmas. This ground-breaking play inspired V-Day, a global movement that has raised millions of dollars for groups working to end violence against women and girls.
