Mickey Leland Energy (MLEF) Program

Eligibility (at the time of application)
- Be at least 18 years of age at time of application.
- Be a U.S. Citizen.
- Have a cumulative GPA of at least 3.0.
- Be available to participate in the full 10-week program.
- Be currently enrolled full-time as a degree-seeking student in a STEM program at an accredited college or university at the Bachelor’s, Master’s or Doctoral level.
- Must be at least a college sophomore at the time of application. Students pursuing an Associate's degree are eligible to apply if transferring to pursue a Bachelor’s degree for Fall 2019.

How to Apply: Applications and supporting materials must be submitted at https://www.zintelllect.com/Opportunity/Details/MLEF-2019

Program Information: Detailed information about the internship can be found at http://energy.gov/fe/mickey-leland-energy-fellowship

For questions, please email us at MLEF@hq.doe.gov.

OFFICE OF STUDENT SCHOLARLY ENGAGEMENT (OSSE) NEWSLETTER

COME VISIT US IN OSSE, BREID 107!

CAFÉ ‘19: 4th Annual Celebration of Academic First-Year Engagement

CAFÉ ’19 Symposium, the annual event which showcases the best work done by first-year students in their respective First-Year Seminars, will be held on Wednesday, February 6, from 4:30-6:00 in the CUB Ballroom.

Each year, at the end of the Fall semester, instructors are asked by the Provost’s Office to nominate students’ projects that best exemplify the learning outcomes for a given seminar. The nominated students then convert their work into poster format and share it with the campus community at the symposium.

Past presenters have expressed how much they enjoyed and learned from the experience. It’s a great opportunity for first-years to get a feel for what it’s like to present their work at a conference but in a much more relaxed and familiar setting. Many of the students enjoy it so much that they present their work a second time at the all-campus colloquium, Celebration, in May.

For further details about this event, including how to register, create a poster, and how to get the poster printed, please go to https://www.gettysburg.edu/about/offices/provost/student-scholarly-engagement/urca/cafe-symposium/
A fellowship opportunity is available in the Division of Laboratory Sciences (DLS) within the National Center for Environmental Health (NCEH) at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia. DLS provides laboratory support that improves the detection, diagnosis, treatment, and prevention of environmental, tobacco-related, nutritional, newborn, selected chronic and selected infectious diseases. DLS also works to improve the rapid and accurate detection of chemical threat agents, radiologic threat agents, and selected toxins.

Collaborating with a multidisciplinary team, the selected participant will use state-of-the-art laboratory equipment to address topics relevant to public health. This will allow the participant to gain hands-on experience in applied analytical chemistry and enhance their knowledge of its applications to public health.

Opportunities may include:
- Developing and applying new analytical methods aimed at characterizing and quantitating biochemical markers that are relevant in environmental exposures and chronic diseases using analytical techniques such as LC-MS/MS, GC-MS, and others.
- Assessing a variety of markers in biological specimens (such as serum or urine)
- Developing reference materials

For a full description of this opportunity and to submit your application, visit https://www.zintellect.com/OpportunityDetails/CDC-DLS-2019-0013

If you have any questions, please send an email to CDCpp@orau.org.

Application Deadline: Jan. 18, 2019

The purpose of the scholarship is to foster cultural exchange between the US and Scotland, by offering five local students an opportunity for one year of study at U. of Edinburgh, St. Andrews, Aberdeen, or Glasgow.

Each successful candidate will be awarded $25,000 which is intended to cover a significant part of the tuition, room, and board. It should be noted that costs to attend and transportation may exceed this amount. The award of the scholarship confers automatic admission to the selected Scottish University.

The FAO SCHWARTZ Fellowship

**DIRECT SERVICE AND SPECIAL PROJECTS:** Each Fellowship offers a combination of direct service and strategic projects that deepen the Fellow’s knowledge of social challenges and build their skills and expertise.

**PAID POSITIONS IN THREE FOCUS CITIES:** The Fellowships are paid two-year positions with benefits at leading nonprofit host organizations in Boston, New York, and Philadelphia.

**UNIQUE OPPORTUNITIES FOR PROFESSIONAL DEVELOPMENT:** The Fellow focuses on professional development and leadership skills through regular retreats, mentoring, and special community experiences.

**VALUABLE NETWORK:** Fellows become part of a cohort of future leaders and connect to an extensive network of alumni Fellows and other social innovation leaders.

Each year, a new cohort of FAO Schwartz Fellows begins paid two-year assignments with leading nonprofit organizations.

The Fellows work at leading nonprofit organizations in Boston, New York City and Philadelphia. These organizations are all deeply valued in their communities and have a strong record of delivering consistent results and high-quality services.

Host organizations vary from year to year — and all have a proven commitment to addressing critical issues of social inequity.

Fellows deepen their knowledge and understanding of relevant social issues, work directly with host communities, and lead strategic projects that strengthen the host organization's capacity and impact.

The FAO Schwartz Fellowship is committed to investing in the professional development of our Fellows through a structured program of retreats, professional trainings, and mentoring.

Fellows attend two four-day leadership retreats each year to learn about the social impact sector, develop critical skills and build relationships with — and learn from — current and alumni FAO Schwartz fellows.

Applicants must be college seniors at the time of application and be eligible to work in the United States for the duration of the Fellowship.

**Timeline:**
- **JANUARY 16, 2019** Online info session for interested students and college advisors.
- **FEBRUARY 15, 2019** Common application deadline for all Fellowship positions.
- **APRIL 2019** Fellow orientations

The FAO Schwartz Fellowship is an intensive, transformative two-year experience in the world of social impact that includes focused professional development. Our Fellows are highly motivated, passionate recent college graduates who are committed to social justice.

They have proven academic excellence, demonstrated leadership in their college communities and are eager to immerse themselves in a two-year experience that will challenge them, train them and empower them with the skills and network they need to take a first step towards leadership in world of social impact.

Prospective Fellows apply directly to the host organizations.

The FAO Schwartz Fellowship chooses a select number of organizations to host Fellows each year, and these hosts are responsible for screening candidates, conducting interviews and ultimately selecting Fellows. We encourage you to learn as much as possible about the host organizations and review the job descriptions before applying.

Applications open each year in mid-November when we announce new host organizations and Fellowship positions.
