at [WVSOM Spring Open House](#)

## URMIA Risk Management Scholarships

URMIA recognizes the need to promote and develop the next generation of higher education risk managers. To help accomplish this goal, in 2015, the URMIA board of directors convened a task force to develop a [scholarship program for educational scholarships](#) for full-time degree seeking students pursuing careers in risk management. The board then felt the success of this program was so important that they made the scholarship task force into a standing committee in 2016. Many members had the opportunity to meet our 2016 student educational scholarship recipients in San Diego last year. We are proud to announce the newly developed scholarship program will continue into year two, the 2017-2018 academic year.

**Eligibility criteria is as follows.** Applicants shall be: full-time degree seeking students who are in good standing at their educational institution, rising juniors, seniors, or masters/doctorate candidates, and pursuing careers in risk management (or a related field), with a preference given for students desiring to enter a career of higher education risk management.

[TO APPLY.](#)

### Food Industry Immersion Trip

May 16-18, 2017

Are you interested in learning more about the local, national, & global practices and issues of the food industry? Would you like to hear about the variety of careers in the industry, such as business, government policy, science, environmental impact, and more? Apply to be a part of this career immersion trip where we will learn about the inner-workings of food companies along the Chesapeake Bay and in Baltimore, like Domino's Sugar & Pompeian Oil, as well as how they contribute to industry practices and global food supply.
