Keep Calm and Turn Your Tassel

Congratulations! Remember this day and all the amazing memories of your four years at Gettysburg College every time you see your graduation tassel on display.

Supplies

- One tassel
- Clear acrylic fillable ornament of your choice
- E6000® adhesive
- Ribbon or bow of your choice
Directions

• Remove your tassel from your mortarboard.

• Open your fillable ornament and lay the two halves on the table.

• Carefully lay your tassel in one of the two halves, making sure that the hanger does not get twisted. You want the hanger to stick out over your top edge, as this will become the hook to hang your tassel keeper.

• Place a small dot of E6000® adhesive at the top of the fillable ornament and hanger.

• Carefully place the second half of your fillable ornament on the first half, creating a tight seal. You may need to place a small piece of tape around the top of the ornament to help keep the hanger in place as the glue dries.

• Once dry, add a ribbon or bow to the top of your ornament!

We want to see what you created
