Computer Science
Senior Capstone Presentation

Thursday, December 8
11:30am, Glatfelter 301

Join us for a presentation of this year’s Senior Capstone projects in Computer Science:

The *Speech Therapy App* team will present a fun and interactive iPad game that provides speech therapy for children born with cleft lip and palate. The game helps the children practice and improve their articulation without adult supervision. The team will also share their experience with iOS development.

The *Programming the Youth* team will present an application that creates an engaging environment for children to learn basic programming concepts. Using the interactive multi-touch capabilities of the SMART Table, the application provides a hands-on learning experience inspired by the LOGO programming language.
