

Internship Policy for International Students

Effective Fall 2013

The following policies are in place for International Students participating in an internship:

- International students seeking academic credit for their internship must register their experience via the student center. Any international student seeking academic credit has to identify a faculty sponsor and notify the Director of International Student Services.
- International students who major in Health Sciences and participate in a capstone must register their experience for academic-credit to be in alignment with the Department of Health Sciences expectations. Health Science Capstone international students must have attended a blood borne pathogen training and their immunization record must be on file in the Health Center. In addition they are required to meet with the Director of International Student Services.
- If you are being paid for an internship through an on-campus department or volunteering (unpaid), you do not have to create an internship learning contract for academic credit. However, we recommend you to register your internship through a Learning Contract – Not for Credit (***see page 4 of this packet for a guide to submitting a Not For Credit Learning Contract***). This will enable the Center for Career Development to have your information on file and confirm your information with any future employers and/or graduate schools.
- If you are participating in an internship with a Non-US affiliated company overseas you do not have to create a learning contract for academic-credit. Again, our office still recommends that you register the experience through a Learning Contract – Not for Credit (***see page 4 of this packet for a guide to submitting a Not For Credit Learning Contract***) for record keeping purposes.
- If you are participating in a paid internship experience (off-campus or with a US affiliated company overseas) you **must register your internship for academic credit** and meet with the Director of International Student Services to discuss use of CPT (curricular practical training). **See pages 2 and 3 of this packet for a guide to submitting a For Credit Learning Contract (International Students).**
