Note. Fall enrollment includes both on- and off-campus students. In recent years, Race/Ethnicity data for domestic students were collected using a 2-question format required by the Integrated Postsecondary Education Data System (IPEDS). The first question asks about ethnicity (is the individual Hispanic or Latino, yes or no) and the second question asks about race (the individual is asked to select one or more race categories with which he or she identifies: American Indian or Alaska Native; Asian; Black or African American; Native Hawaiian or Other Pacific Islander; White); individuals who answer Yes to the first question are reported as Hispanic/Latino (regardless of race); those who do not answer either question are reported as "Race and Ethnicity Unknown". Non-Resident Alien (IPEDS language)/International Students are reported as a separate group.

*Asian or Native Hawaiian or Other Pacific Islander (PI). **This category refers to students who answered "no" to the first question (see above; i.e., not Hispanic) and who selected more than one race. The great majority of students who selected more than one race selected two or more minority races. The percentages displayed above for a specific racial group (e.g., Asian) did not include those who selected that particular race and another race; for example, in Fall 2020, 111 (4.4%) of full-time, degree-seeking students self-identified as Black/African American (and did not select another race); additionally, at least 15 students selected both Black/African American and another race; if combining these two groups, then the percentage would be higher than what is displayed above.
