

Number of Midyear Graduates (Baccalaureate Degree Recipients)

5-average (2010-2014): 26

Pre-Pandemic 5-yr average (2015-2019): 34

4-yr average* (2020, 2023, 2024, 2025): 32

**December 2021 and December 2022 graduates were not included in calculating this 4-yr average, as the COVID-19 Pandemic caused a delay in some students' expected graduation date--Number of mid-year graduates for each of those two years was not typical: Among them, there was a disproportionately large number of students who took more than four years to graduate.*

Mid-year Graduates as a Percent of Fall Total Enrollment (Undergraduates)
